The laboratory grown diamond described in this Report (Report) has been graded, tested, analyzed, examined and/or inscribed by international Germological institute (LG.1). A laboratory grown diamond is one that has essentially the same chemical, physical and oplical properties as a mined diamond, with the exception of being grown by man (a manufacture) product). I.G.I. employs and utilizes those techniques and equipment currently available to I.G.I. including, without limitation, 10X magnification, corrected triplet loupe, binocular microscope, master color comparison stones, non-contact-optical measuring device, Diamond Sue^M, Diamond View^{IM}, Spectraphotometer and such other instruments and/or processes as deemed appropriate by I.G.I. This Report includes advanced security features. A duly accredited gemologit or jeweier can advise you with respect to the importance of and interretationship between curcles.
